

Firm Obtains Favorable Settlement Preventing the Revocation of Client's Licensure with the Georgia Department of Early Care and Learning

We represented a daycare center that focuses on providing childcare to low-income families. The Georgia Department of Early Care and Learning initiated proceedings to revoke our client's child care learning center license due to an incident that occurred at the daycare. We were able to reach an agreement with the Department which allowed our client to maintain its license and continue to provide childcare for those families that need it most.
