

Regulated Industries & Professional Licenses

We understand that not all industries and professions are governed by the same rules. Our lawyers have a long history of helping companies and persons in highly regulated environments ranging from political candidates to healthcare professionals to corporations permitted and licensed by federal and state entities. We regularly provide compliance counseling for clients facing new laws and regulations, and we proactively work with regulators and government affairs professionals on behalf of our clients. If necessary, we assist clients in court and before administrative bodies in disputes over laws and regulations that govern particular industries and individuals.

Many of our attorneys worked in state and federal government positions before joining the Robbins Firm and, as a result, are able to offer our clients a high degree of expertise and familiarity in navigating the complex regulatory environments in which they operate.

Specific areas of expertise include healthcare regulation, gaming, professional licensing boards, alcoholic beverages, securities regulation, and land use.
